GENERAL INSTRUCTIONS

The information compiled below is important. Please read carefully.

KEEPING THE TELEPHONE DIRECTORY UP-TO-DATE

Under no circumstances will users move, alter, or tamper with telephone equipment installed. To change, correct, or to receive a telephone directory listing, prepare Form BRM 2409 and forward to Telephone Room, Dept. 997.

TONES AND SIGNALS

Dial Tone -- A steady humming sound, indicating that equipment is ready to receive your call.

Ringing Signal -- A "Burr-rring" sound repeated at regular intervals, indicating the called telephone is ringing.

Busy Signal -- A "Buzz-buzz-buzz" sound, indicating the called telephone is in use. When you hear a busy signal, hang up immediately and wait several minutes before redialing the same number.

TO OPERATE DIAL PHONE

1. Remove the receiver from the hook and listen for the dial tone. Do not jiggle the hook when removing the receiver or when dialing. If dial tone is not heard, replace the receiver and in a few seconds try again. **DO NOT ATTEMPT TO DIAL BEFORE THE DIAL TONE IS HEARD;** this will result in a wrong number.
2. When dialing, allow the dial to return to normal position before dialing the next figure. Do not force or retard the return of the dial, as wrong numbers will result.
3. If phone you are calling is busy, replace the receiver immediately and wait at least several minutes before dialing the same number again. Do not dial first two numbers and wait, as this only holds up your own line.
4. When the phone you are calling is answered, identify yourself, and make your conversation as brief as possible. Try to complete your business on one call by securing **ALL** the information you need or by leaving a message. If you request a "call-back," give your extension number and the best time for the call-back to be made.

5. When you have finished talking, be sure the receiver is placed on the hook properly or laid in the cradle, otherwise a false busy signal may be given on your line.

DIALING SUGGESTIONS--Do not move the dial or receiver hook while talking, or the connection may be broken.

PARTY LINES--Listen for dial tone before you dial to be sure the line is not in use. If, while making a call, another party on the same line removes the receiver, or if you hear his dialing, stop dialing and inform him the line is in use. When he hangs up, hang up your own receiver for a few seconds and then redial the desired number.

TRANSFERRING CALLS--When transferring a call, signal the operator by **SLOWLY** moving the receiver hook or plunger once. **DO NOT DIAL "0" TO SIGNAL THE OPERATOR.** Outgoing calls dialed through code "9" cannot be transferred and any attempt to do so will result in a cut-off.

ANSWERING CALLS--Telephones should always be answered promptly. Try to answer on first ring.

LONG DISTANCE CALLS--All long distance calls **MUST** be placed through the Bendix Radio operator by dialing "Operator." "Direct Dialing" of long distance calls by personnel within the Division is **PROHIBITED.** Non-compliance with the above prohibition will involve restriction or disconnection of telephones.

1. **HAVE ALL INFORMATION AT HAND** before calling. Please give your call to the Long Distance operator in this order: a-- The City and State you want. b -- The telephone number if you know it. (On "person" calls, include the name of the person you are calling. c-- If you don't know the number, give the name and address of the party you are calling. d -- Your name, extension No. and Dept. No.

2. **AFTER PLACING A CALL REMAIN AT YOUR PHONE.** If it is necessary to leave your office, let the operator know where you can be located, or make arrangements for someone in the office to handle the call in your absence.

3. **MAKE ONLY NECESSARY CALLS** on matters which **CANNOT** be handled **EXCEPT** by telephone. Make these calls as brief as possible.

REMEMBER - - - Courtesy is a telephone necessity.
